

To Sergey,

1. The first task was simple because the video tutorials/lessons in LMS literally went through the task twice.
2. Task 2 was a nudger, where I of course understand how to build classes etc. But the task in LMS was difficult to understand so I had to look at your presentation on lesson 13 of how to solve the task..
3. I decided to not do task 3 because I have to move on in the lessons and homework, I am very behind.
